Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of claims:

Claim 1. (Currently Amended) A topical pharmaceutical composition, comprising a topically acceptable carrier, and at least one ~~active ingredient, a~~ cyclic psychotropic agent~~, said cyclic psychotropic agent being~~ other than doxepine and tomoxetine.

Claim 2. (Currently Amended) [[A]] The composition according to ~~Claim~~ claim 1, wherein the at least one cyclic psychotropic agent comprises at least one ~~is an~~ anti-depressant agent.

Claim 3. (Currently Amended) [[A]] The composition according to ~~Claim~~ claim 2, wherein ~~active~~ the at least one anti-depressant agent is selected from[[:]] the group consisting of a selective serotonin re-uptake inhibitor (SSRI) ~~inhibitors (SSRIs)~~; a selective noradrenaline re-uptake inhibitor (NRIS) ~~inhibitors (NRISs),~~; a serotonin and noradrenergic re-uptake inhibitor (SNRI) ~~inhibitors (SNRIs)~~; a cyclic ~~anti-depressants,~~ anti-depressant; and an atypical anti-depressant.

Claim 4. (Currently Amended) [[A]] The composition according to ~~Claim~~ claim 3, wherein:

(a) the ~~SSRIs are selected from:~~ SSRI is selected from the group consisting of fluoxetine, paroxetine and sertraline;

(b) the ~~NRISs being :~~ NRIS is reboxetine

(c) the SNRI is selected from[[:]] the group consisting of venlafaxine, duloxetine and milnacipran;

(d) the cyclic anti-depressant is selected from the group consisting of [[:]]

(d1) a tricyclic anti-depressant selected from [[:]] the group consisting of imipramine, clomipraminne, amitriptyline and doxepinee;

(d2) a bicyclic ~~anti-depressants~~ anti-depressant selected from[[:]] the group consisting of paroxetine, and sertraline;

(d3) a monocyclic ~~anti-depressants~~ anti-depressant ~~selected from:~~ comprising a phenylpropylamine ~~derivatives~~ derivative; and ~~The composition according to Claim 4, wherein the phenylpropylamine derivates are phenoxy-3-propylamine derivatives.~~

(d4) an atypical ~~antidepressants~~ anti-depressant selected from [[:]] the group consisting of mianserin, bupropion, mirtazaoin, and trazodone.

Claim 5. (Currently Amended) The composition according to claim 4, wherein the phenylpropylamine ~~derivates are~~ derivative is a phenoxy-3-propylamine ~~derivatives~~ derivative.

Claim 6. (Currently Amended) The composition according to ~~Claim~~ claim 5, wherein the phenoxy-3 proplylamine ~~derivatives are~~ derivative is selected from[[:]] the group consisting of nisoxetine, fluoxetine, norfluoxetine, reboxetine, atomoxetine and venlafaxine.

Claim 7. (Currently Amended) The composition according to ~~Claim~~ claim 1, wherein the at least one cyclic psychotropic agent is at least one [[an]] anti-psychotic drug.

Claim 8. (Currently Amended) The composition according to ~~Claim~~ claim 7, wherein the at least one anti-psychotic drug is selected from the group consisting of an tricyclic anti-psychotic drug and an atypical antipsychotic drug.

Claim 9. (Currently Amended) The composition according to ~~Claim~~ claim 8, wherein the tricyclic anti-psychotic drug is phenothiazine.

Claim 10. (Currently Amended) The composition according to ~~Claim~~ claim 9, wherein the phenothiazine is selected from[[:]] the group consisting of thioridazine, perphenazine, trifluoperazine and fluphenazine.

Claim 11. (Currently Amended) The composition according to ~~Claim~~ claim 8, wherein the tricyclic antipsychotic drug is a ~~thioxanthenes~~ thioxanthene.

Claim 12. (Currently Amended) The composition according to ~~Claim~~ claim 11, wherein the ~~thioxanthenes are~~ thioxanthene is selected from the group consisting of flupenthixol, thiothixene, chlorprothixene and zuclopentihixol.

Claim 13. (Currently Amended) The composition according to ~~Claim~~ claim 8, wherein the atypical anti-psychotic drug is selected from the group consisting of clozapine, quetiapine, ziprazidone, olanzapine and risperidone.

Claim 14. (Currently Amended) [[A]] The composition according to claim 1, comprising [[in]] a formulation selected from[[:]] the group consisting of an ointment, a cream, a gel, a solution, a suspension, a lotion, a shampoo, a foam, a lyposomic formulation, a paste, an emulsion, a salve, suppositories, vaginal tablets, ocular salves or drops, otic drops, nasal spray and nasal drops.

Claim 15. (Currently Amended) [[A]] The composition according to claim 14, comprising a formulation selected from the group consisting of ~~in a formulation selected from:~~ a cream, an ointment, a gel, a foam, a solution, and a lotion.

Claim 16. (Withdrawn) A method for the treatment of a dermatological disease, disorder, or pathology the method comprising, topically administering to a subject in need of dermatological treatment, a therapeutically effective amount of a psychotropic cyclic agent, said cyclic psychotropic agent being other than atomoxetine and doxepine.

Claim 17. (Withdrawn) A method for the treatment of hyper-proliferative dermatological diseases, disorders or pathological conditions, comprising topically administering to a subject, in need of such treatment, a therapeutically effective amount of a cyclic psychotropic agent,

wherein, where the hyper-proliferative skin disorder is psoriasis, the cyclic psychotropic agent is not atomoxetine.

Claim 18. (Withdrawn) A method according to Claim 17, wherein said hyperproliferative skin disease or disorder is selected from: psoriasis, scerloderma, epidermal hyperplasia, hyperkeratosis, acanthosis, papilloma, actinic keratoses, and skin cancer.

Claim 19. (Withdrawn) The method according to Claim 18, wherein said skin cancer is selected from basal cell carcinoma, melanoma, squamous cell carcinoma, cutaneous T-cell lymphoma and Kaposi's sarcoma.

Claim 20. (Withdrawn) The method according to Claim 17, wherein the cyclic psychotropic agent is an anti-depressant.

Claim 21. (Withdrawn) The method according to Claim 20, wherein the anti-depressant is selected from: selective serotonin re-uptake inhibitor (SSRI); selective noradrenaline re-uptake inhibitor (NRIS), serotonin and noradrenergic re-uptake inhibitor (SNRI); cyclic anti-depressants, and atypical anti-depressant.

Claim 22. (Withdrawn) The method according to Claim 21, wherein:

(e) the SSRI is selected from fluoxetine, paroxetine and sertraline;

(f) the NRIS is selected from: atomoxetine and reboxetine;

(g) the SNRI is selected from venlafaxine, duloxetine and milnacipran;

(h) the cyclic anti-depressant is selected from:

(d1) tricyclic anti-depressant selected from: imipramine, clomipraminne, amitriptyline and doxepinee;

(d2) bicyclic anti-depressants selected from: paroxetine, sertraline and citalopram;

(d3) monocyclic anti-depressants selected from: phenylproply derivatives, fluoxetine and norfluoxetine

(d4) atypical anti-depressants selected from:: mianserin, bupropion, mirtazaoin and trazodone.

Claim 23. (Withdrawn) The method according to Claim 22, wherein the phenylpropylamine derivates are phenoxy-3-propylamine derivatives.

Claim 24. (Withdrawn) The method according to Claim 23, wherein the phenoxy-3 proplylamine derivatives are selected from: atomoxetine, nisoxetine, fluoxetine, norfluoxetine, reboxetine and venlafaxine.

Claim 25. (Withdrawn) The method according to Claim 17, wherein the cyclic psychotropic agent is an anti-psychotic drug.

Claim 26. (Withdrawn) The method according to Claim 25, wherein the anti-psychotic drug is selected from tricyclic anti-psychotic drug and atypical antipsychotic drug.

Claim 27. (Withdrawn) The method according to Claim 26, wherein the tricyclic anti-psychotic drug is phenothiazine.

Claim 28. (Withdrawn) The method according to Claim 27, wherein the phenothiazine is selected from: thioridazine, perphenazine, trifluoperazine and fluphenazine.

Claim 29. (Withdrawn) The method according to Claim 26, wherein the tricyclic antipsychotic drug is thioxanthenes.

Claim 30. (Withdrawn) The method according to Claim 29, wherein the thioxanthenes are selected from flupenthixol, thiothixene, chlorprothixene and zuclopentihixol.

Claim 31. (Withdrawn) The method according to Claim 26, wherein the atypical anti-psychotic drug is selected from clozapine, quetiapine, ziprazidone, olanzapine and risperidone.

Claim 32. (Withdrawn) A method for the treatment of an inflammatory dermatological disease, disorder or pathological condition comprising topically administering to a subject, in need of such treatment, a therapeutically effective amount of a cyclic psychotropic agent,

wherein, where the inflammatory skin disorder, disease or pathological condition is manifested by pruritus, the cyclic psychotropic agent is not doxepine.

Claim 33. (Withdrawn) A method according to claim 32 wherein, where the inflammatory skin disorder, disease or pathological condition is manifested by pruritus, or the skin disorder is atopic dermatitis the cyclic psychotropic agent is not doxepine.

Claim 34. (Withdrawn) A method according to Claim 33, wherein the inflammatory disease, disorder or pathological condition is an autoimmune disease.

Claim 35. (Withdrawn) A method according to Claim 34, wherein said autoimmune skin disorder is selected from: vitiligo, scerloderma, alopecia areata, psoriatic arthritis, lichen planus, lichen sclerosus, discoid lupus, lupus erythematosus, leg ulceration in rheumatoid arthritis, atopic dermatitis, cicatrical pemphigoid and pyoderma gangrenosum.

Claim 36. (Withdrawn) A method according to Claim 34, wherein the inflammatory disease is a non-autoimmune disease.

Claim 37. (Withdrawn) A method according to Claim 36, wherein the inflammatory disease is selected from: rosacea, pruritus, seborrheic dermatitis and contact dermatitis .

Claim 38. (Withdrawn) A method according to Claim 33, wherein the cyclic psychotropic agent is an anti-depressant.

Claim 39. (Withdrawn) A method according to Claim 38, wherein the active anti-depressant is selected from: selective serotonin re-uptake inhibitor (SSRI); selective noradrenaline re-uptake inhibitor (NRIS), serotonin and noradrenergic re-uptake inhibitor (SNRI); cyclic anti-depressants, and a typical anti-depressant.

Claim 40. (Withdrawn) A method according to Claim 39, wherein:

(i) the SSRI is selected from: fluoxetine, paroxetine, sertraline;

(j) the NRIS is selected from: atomoxetine and reboxetine;

(k) the SNRI is selected from: venlafaxine, duloxetine and milnacipran;

(l) the cyclic anti-depressant selected from

(d1) tricyclic anti-depressant selected from imipramine, clomipraminne, amitriptyline and doxepine;

(d2) bicyclic anti-depressants selected from paroxetine, sertraline and citalopram;

(d3) monocyclic anti-depressants are phenylpropylamine derivatives fluoxetine and norfluoxetine.

(d4) atypical anti-depressants selected from mianserin, bupropion, mirtazaoin and trazodone.

Claim 41. (Withdrawn) A method according to Claim 40, wherein the phenylpropylamine derivates are phenoxy-3-propylamine derivatives.

Claim 42. (Withdrawn) A method according to Claim 41, wherein the phenoxy-3 proplylamine derivatives are selected from: atomoxetine, nisoxetine, fluoxetine, norfluoxetine, reboxetine and venlafaxine.

Claim 43. (Withdrawn) A method according to Claim 33, wherein the cyclic psychotropic agent is an anti-psychotic drug.

Claim 44. (Withdrawn) A method according to Claim 43, wherein the anti-psychotic drug is selected from tricyclic anti-psychotic drug and atypical antipsychotic drug.

Claim 45. (Withdrawn) A method according to Claim 44, wherein the tricyclic anti-psychotic drug is phenothiazine.

Claim 46. (Withdrawn) A method according to Claim 45, wherein the phenothiazine is selected from: thioridazine, perphenazine, trifluoperazine and fluphenazine.

Claim 47. (Withdrawn) A method according to Claim 43, wherein the tricyclic antipsychotic drug is thioxanthenes.

Claim 48. (Withdrawn) A method according to Claim 47, wherein the thioxanthenes are selected from flupenthixol, thiothixene, chlorprothixene and zuclopentihixol

Claim 49. (Withdrawn) A method according to Claim 43, wherein the atypical anti-psychotic drug is selected from clozapine, quetiapine, ziprazidone, olanzapine and risperidone .

Claim 50. (Withdrawn) A method for sensitizing skin cancer cells to chemotoxic drugs, the method compriing topically administering to a subject, in need of chemotoxic therapy a therapeutically effective amount of a cyclic psychotropic agent, with the proviso that the cyclic psychotropic agent is not fluoxetine.

Claim 51. (Withdrawn) A method according to claim 50 wherein the skin cancer is multi-drug resistant skin cancer.

Claim 52. (Withdrawn) A method according to claim 50 wherein the cyclic psychotropic drug is topically administered simultaneously with the administration of the chemotoxic drug .

Claim 53. (Withdrawn) A method according to claim 50 wherein the cyclic psychotropic drug is topically administered prior to the administration of the chemotoxic drug.

Claim 54. (Withdrawn) A method according to claim 50 wherein the chemotoxic drug is administered systemically.

Claim 55. (Withdrawn) A method according to claim 50 wherein the cyclic psychotropic agent is a cyclic anti-psychotic drug.

Claim 56. (Withdrawn) A method according to claim 55 wherein the anti-psychotic drug is a tricyclic antipsychotic drug.

Claim 57. (Withdrawn) A method according to claim 56 wherein the trycyclic antipsychotic drug is phenothiazine.

Claim 58. (Withdrawn) A method according to Claim 57, wherein the phenothiazine is selected from: thioridazine, perphenazine, trifluoperazine and fluphenazine

Claim 59. (Withdrawn) A method for identifying and screening for , an active agent for the treatment of a dermatological/mucosal disease, disorder or pathological condition by topical or mucosal application, the method comprising:

(a) providing one cyclic psychotropic drug as a candidate active agent;

(b) applying the cyclic psychotropic drug to a biological model system for said dermatological/mucosal disease, disorder or pathological condition;

(c) monitoring the change in at least one physiological parameter, said change being indicative of a beneficial therapeutic effect in said biological model system;

wherein a significant change in said at least one physiological parameter as compared to control indicates that the candidate cyclic psychotropic agent is active for the treatment of said dermatological disease, disorder or pathological condition.

Claim 60. (Withdrawn) A method according to claim 59 wherein the cyclic psychotropic drug is an anti psychotic drug or an antidepressant.

Claim 61. (New) The composition according to claim 1, wherein the composition is effective for the treatment of dermatological diseases, disorders or pathologies.

Claim 62. (New) The composition according to claim 61, wherein the dermatological diseases, disorders or pathologies are hyper-proliferative, provided that when the disease is psoriasis, the cyclic psychotropic agent is not atomoxetine.

Claim 63. (New) The composition according to claim 62, wherein said hyper-proliferative disease, disorder or pathology is selected from the group consisting of psoriasis, scerloderma, epidermal hyperplasia, hyperkeratosis, acanthosis, papilloma, actinic keratoses, and skin cancer.

Claim 64. (New) The composition according to claim 63, wherein the skin cancer is selected from the group consisting of basal cell carcinoma, melanoma, squamous cell carcinoma, cutaneous T-cell lymphoma and Kaposi's sarcoma.

Claim 65. (New) The composition according to claim 1, wherein the composition is effective for the treatment of inflammatory dermatological diseases, disorders or pathologies, provided that when the inflammatory disease, disorder or pathology is atopic dermatitis or manifested by pruritus, the cyclic psychotropic agent is not doxepine.

Claim 66. (New) The composition according to claim 65, wherein the inflammatory disease, disorder or pathology is an autoimmune disease, disorder or pathology.

Claim 67. (New) The composition according to claim 66, wherein said autoimmune disease, disorder or pathology is selected from vitiligo, scerloderma, alopecia areata, psoriatic arthritis, lichen planus, lichen sclerosus, discoid lupus, lupus erythematosus, leg ulceration in rheumatoid arthritis, atopic dermatitis, cicatrical pemphigoid and pyoderma gangrenosum.

Claim 68. (New) The composition according to Claim 65, wherein the inflammatory disease is a non-autoimmune disease.

Claim 69. (New) The composition according to Claim 68, wherein the non-autoimmune disease is selected from rosacea, pruritus, seborrheic dermatitis and contact dermatitis.
